

# DAILY APPEAL

MEMPHIS.

TUESDAY MORNING, FEB. 3, 1887.

The APPEAL is regularly discontinued at the end of the time subscribed for, unless renewed in advance.

## DEATH OF CHARLES M. DENIE.

A telegraphic dispatch to a brother in this city conveys the melancholy intelligence that Charles M. Denie died in New Orleans on Saturday last, of an affection of the brain. Mr. Denie had only been residing in New Orleans about three months, and was, we believe, a reporter for one of the morning journals. His fugitive productions, given to the public through the medium of the newspapers of this city, prove him to have been a poet of no inconsiderable merit. Intense feeling was the predominant feature of his composition. The diction was pure, and rhythm harmonious. The observation and talent he possessed, if employed upon a more remunerative profession, would have secured him competency and position far superior to that which he attained by writing poems for the journals. Mr. Denie was at one time connected with the *Evening Express* as editor, and subsequently as editor of the *Sunday Wage*. Peace to his ashes, and an eternal calm to his soul!

## MEMPHIS FEMALE COLLEGE.

We took occasion, some days since, to call attention to this flourishing institution, intending at a future time, to give it a more extended notice. The College grounds are elevated, and front 200 feet on Adams and Washington sts., east of the Bayou. The edifice is a large four-story building, admirably arranged for scholastic purposes, and finished in a style which would be creditable to any city in the Union. The dormitories are large, well ventilated, and furnished in a manner far superior to those of most boarding schools. The chapel is about as well suited as an ordinary city church, and is well adapted for a lecture room. The academic halls are furnished with single desks and chairs, nearly finished, and made according to the most improved models. All the rooms in the building are warmed by the use of coal, so that the dangers of fire are, as much as possible, avoided.

All the departments are filled by accomplished scholars and experienced instructors. The founders have intended to establish a Southern College for females, affording all necessary advantages and facilities for a thorough and extensive education, both in the secular and ornamental branches. The Memphis Female College is now a triumphant vindication of their success. To the agents of this noble enterprise our citizens owe a debt of gratitude. There is no longer a necessity for any young lady to be sent from our city for educational purposes.

What department to other professors, we may say that a course of Dr. MILLIKEN'S experimental lectures in natural philosophy and chemistry, illustrated with an extensive apparatus, is more than worth the whole tuition fee.

As a continuation of our remarks, in a former number, on the "Commercial Property of Memphis," we point to this College as an important element. Every young lady who is educated here will be a saving to our community of a thousand or more dollars, which would otherwise be sent to some distant part of the country. And every one who is sent here to be educated will likely be the means of bringing to our city a like amount of money. Put all these things together, which are accumulating from year to year, and it will be perceived that the Memphis Female College is doing a noble work, and directly or indirectly benefiting all other branches of business.

No location, perhaps, could be more desirable for a first class College. Memphis being the centre of business for a large section of country, pupils can be sent here with comparative ease, and the parents can be assured that their children will be well educated, and can easily hear from their daughters, and frequently send such articles as may be useful to them.

With regard to health it is enough to say that there has not been a death or a single case of serious sickness among the pupils at the College during the past five sessions. The known experience and scholarship, the punctuality, business habits and energy of the President, and what he has already done, constitute the best guaranty that he will do everything that can be done to promote the prosperity of the College.

We would not be understood as indifferent to the claims of other literary institutions. We heartily wish them all abundant success.

## THE WASHINGTON UNION.

The rumor is current, although we think no defensible argument to that effect has been consummated, that Hon. John Appleton, of Maine, is to succeed Judge Nicholson as editor of the Washington Union. We are quite certain that we are not mistaken in the fact that Mr. Appleton's accession to the post named will be received with satisfaction by the entire Democratic party of the Union. He is a gentleman of fine talents, familiar with public life, and has been in Congress, and served as Secretary of Legation at London, while Mr. Buchanan was Minister—according to editors, as the conductor of the *Eastern Argus*, a paper of decided ability and discretion; and above all, as a qualified and experienced journalist. The rumor assigns him, however, sagacity and prudence. He is well understood to enjoy, in a high degree, the confidence of the President of the incoming President—Abraham Lincoln.

The rumor referred to above is well founded. After the 4th of March the editor of this paper will retire, when the Hon. JOHN APPLETON will become sole editor and proprietor. The arrangements which have resulted in this change have been consummated with the slightest difficulty, and we sincerely congratulate our readers upon a result which secures the services of a gentleman whose eminent qualifications are so truthfully set forth in the above remarks of the *Albany Argus*. We may be excused for adding that our retirement is voluntary, and in pursuance of a resolution long since made. At present we have no further to say on this subject.

## THE LINCOLN JOURNAL OF THE 23d ARGUS.

We regret to learn, that Mr. DANIEL SMITH on Swan creek, had his kitchen burnt on Monday night, and two negroes, a boy and girl were burned to death, another girl was badly burned but not hurt.

## THE PURDY ARGUS, of last Saturday.

Two persons passed through this place last Saturday in search of own Brown, who, it is said, had mortally wounded a person whose name we learn is C. F. Young. The affair took place in this county at the Big Hill, as it is familiarly called. We know nothing of the particulars.

## MEMPHIS AND LITTLE ROCK RAILROAD.

For the Memphis Appeal.

MESSRS. EDITORS: We are pained to see the *State Rights Democrat*, which has been conducted through the late canvass with so much credit to the Democracy, and the enemies of the Memphis and Little Rock Railroad may convey to its numerous readers their exaggerated tales and groundless charges against said road. There was a time when doubts existed as to its ultimate success, and then its editorial would not have been so inexcusable. But now, when hope is reviving and prospects brightening, it is a disgrace to a citizen of Arkansas, whose State pride extends beyond his country, to attempt to destroy confidence in a work of so much moment to no small portion of Arkansas. We are surprised to see how a newspaper of character may be warped by prejudice, prompted by avarice and circumscribed by county lines. One would think from the tenor of its editorial, that the Memphis and Little Rock Railroad Company is about to prove injurious to our State.

But it is not true that it does fall through, the lands will revert, and that if any loss happens, Memphis and the stockholders are benefited, in a three-fold proportion. It is not true that the road will be a consequence of ours. In other words, we have all to make and nothing to lose. It will hold all the sanction of the extension of time granted by the late Legislature of Arkansas, because it says that it is a trick, and that the unfortunate difficulty which occurred between the President and contractors was a scheme to carry out a fraudulent design. But scheme to carry out a fraudulent design. But scheme to carry out a fraudulent design. But scheme to carry out a fraudulent design.

These facts are all apparent to you, and I hope require no argument to induce you to act promptly in the matter. It is true that the individual practitioner may succeed in procuring a competency, and do much good in his respective sphere; but when we shall have done this, we will have only commenced the work of the many duties that rest upon our physicians. It was never designed by the Supreme Architect of heaven and earth, that we should live for ourselves alone. We should be laborious in all great and important undertakings. It is our duty, as reform physicians, to labor assiduously for the elevation of our profession; and in the proportion that we do this, we necessarily elevate ourselves with all our colleagues and good people. By this, the enemies to our cause will be forced to respect us, although they may not like us.

This is a field in which all can labor, and if we but work together in solid phalanx, as it were, it will result in an amount of interest and general good to our profession that we will far surpass the expectations of the most sanguine. We are not asking you to do any other direction to which we could give our efforts for a similar length of time. Then we can to our colleagues, meet us in the city of Memphis, Tennessee, on the 24th of March next. I can assure you, upon the authority of many able and eminent medical men, that the men we are capable of making are not to be despised. We are asked by the Faculty of the Botanic-Medical College, of Memphis, that no time or labor will be spared on their part in making the occasion all that our profession may desire.

Again, we have been assured by the Faculty of the Southern Reform Medical College, of Marion, Ga., that they will do their whole duty in support of this cause, and we are sure that there are many noble spirits, outside of these institutions, that are actively engaged and feel a lively interest in this meeting.

We expect several members of the Faculty of the Southern Reform Medical College, of Marion, Ga., to be present, as well as the entire Faculty of the Botanic-Medical College, of Memphis. We know many other eminent gentlemen who say they will be with us on that occasion. We had the pleasure of making the acquaintance of Dr. R. C. Bryan, of Georgia, at Atlanta, last May, who is the regular appointee of that meeting to deliver the anniversary address, and we can assure you that he is a gentleman of much ability, and that he doubtless will address everything that our prize may wish.

Again, there will be read before the Association a very considerable number of essays upon the various difficult forms of disease, new articles of medicine, &c., which will develop an amount of substantial knowledge that cannot be collected in any other way, and cannot fail to result in much interest and profit to the profession.

Those who have been appointed to this task are generally gentlemen of long experience in the practice of medicine, and are doubtless fully adequate to the task. They will have had ample time to mature their subjects well, and cannot fail to make them very interesting and highly instructive.

We are desirous of seeing the many able addresses delivered by various members of our profession, who are fully adequate to the task. In a word we will just say, that it will, beyond doubt, be the largest, most interesting and profitable meeting that has ever been convened in the United States of America. We sincerely hope that none, not one of our profession, will stand aloof from this great work.

## ALABAMA INTELLIGENCE.

The Masonic Hall in Tuskegee was destroyed by fire on the 21st inst. There were several law offices in the first story of the building, and the fire broke out in the office of Hon. P. S. Lyon, of Marengo, declined being considered an aspirant for the Governorship.

The cotton gin, belonging to Mr. Geo. Randall in Talladega county, was burnt a few days ago, with 40 bales of cotton.

We copy the following items from the Huntsville *Advertiser* of Thursday last: The weather still continues bad. The ice and snow last week disappeared under a general thaw on Sunday. And it rained all Tuesday night, and the clouds still indicate more rain. We look for a heavy rain this morning.

We regret to learn that the late Senator Robert Strong, near Meridianville in this county, died of cancer on Saturday morning last. About 14 bales of cotton belonging to John St. John, Esq., was consumed in the gin house. It is reported that the fire communicated to the cotton in the gin.

The Tennessee river was frozen over, and persons crossed on the ice at various places, &c., and persons were killed. The ice in the river at Decatur! This thing were never known before.

We are informed that the late Senator Robert Strong, near Meridianville in this county, died of cancer on Saturday morning last. About 14 bales of cotton belonging to John St. John, Esq., was consumed in the gin house. It is reported that the fire communicated to the cotton in the gin.

## AN APPEAL TO THE REFORMED ASSOCIATION OF MEDICINE.

LAVAYETTE, Ky., January 10, 1887.

Gentlemen of the Reformed Association of Medicine: Again it is made my duty, as it is my pleasure, to call upon you to co-operate with me in the great and noble cause of medical reform. You are all doubtless aware of the fact that the Southern Reformed Medical Association will convene in the halls of the R. M. College, in the city of Memphis, Tenn., on the 24th of March next. This Association was thoroughly organized in the city of Atlanta, Ga., in May, 1856.

This meeting was well attended, and as you have doubtless seen from the minutes, a vast amount of business of much importance and interest to the profession transacted. There were many eminent gentlemen of our profession present. Seven of the Southern States were represented in the meeting, and perhaps the largest representation of the reformed profession of medicine that has ever convened in the United States. Now it is hoped and expected, by the members of this Association, that a still more thorough organization of our forces will be effected. It would be useless for me, in this call, to introduce a system of argument to convince you of the paramount necessity for me to say to you that much, very much, good is the inevitable result of these meetings. Again, it would be needless for me to labor to show you that the prosperity and final triumph of our cause are dependent upon a thorough organization and co-operation of all who are engaged in our ennobling profession.

These facts are all apparent to you, and I hope require no argument to induce you to act promptly in the matter. It is true that the individual practitioner may succeed in procuring a competency, and do much good in his respective sphere; but when we shall have done this, we will have only commenced the work of the many duties that rest upon our physicians. It was never designed by the Supreme Architect of heaven and earth, that we should live for ourselves alone. We should be laborious in all great and important undertakings. It is our duty, as reform physicians, to labor assiduously for the elevation of our profession; and in the proportion that we do this, we necessarily elevate ourselves with all our colleagues and good people. By this, the enemies to our cause will be forced to respect us, although they may not like us.

This is a field in which all can labor, and if we but work together in solid phalanx, as it were, it will result in an amount of interest and general good to our profession that we will far surpass the expectations of the most sanguine. We are not asking you to do any other direction to which we could give our efforts for a similar length of time. Then we can to our colleagues, meet us in the city of Memphis, Tennessee, on the 24th of March next. I can assure you, upon the authority of many able and eminent medical men, that the men we are capable of making are not to be despised. We are asked by the Faculty of the Botanic-Medical College, of Memphis, that no time or labor will be spared on their part in making the occasion all that our profession may desire.

## FROM WASHINGTON CITY.

Correspondence of the Richmond Register.

WASHINGTON, January 15, 1887. IMPROVEMENT OF THE UNITED STATES JUDGE FOR THE DISTRICT OF TEXAS—BENJAMIN CHAMBERS. The bill for the improvement of the United States Judge for the District of Texas, Benjamin Chambers, was introduced in the House of Representatives on January 15, 1887. The bill was introduced by Mr. [Name], and was referred to the Committee on the Judiciary.

I have been aware for some time of the main features of the great impeachment case which will shortly come before the House. The bill will be introduced in the House of Representatives on January 15, 1887. The bill was introduced by Mr. [Name], and was referred to the Committee on the Judiciary.

## The Territories of the United States.

New Territories are carved out of the far and distant lands of the United States. The most important of these are the Territories of Alaska, Arizona, California, Colorado, Idaho, Kansas, Montana, Nebraska, Nevada, New Mexico, Oklahoma, Oregon, Utah, Washington, and Wyoming. These Territories are all under the direct control of the Federal Government.
